

Juice Shop is an OWASP Flagship project by Bjorn Kimminich:
<https://github.com/juice-shop/juice-shop>

Multi juicer is a companion project by Jannik Hollenbach:
<https://github.com/juice-shop/multi-juicer>

Case design by Bram Patelski as commissioned by Bjorn Kimminich

Lego bricks: See Bill of Material at the end of this document

Hardware:

4x Raspberry Pi 4
4x SD card 16 GB
4x Raspberry Pi 4 POE+ HAT
4x Ethernet Cable Cat5e 0.5m
1x Ethernet Cable Cat5e 1m
1x POE switch 5+ ports

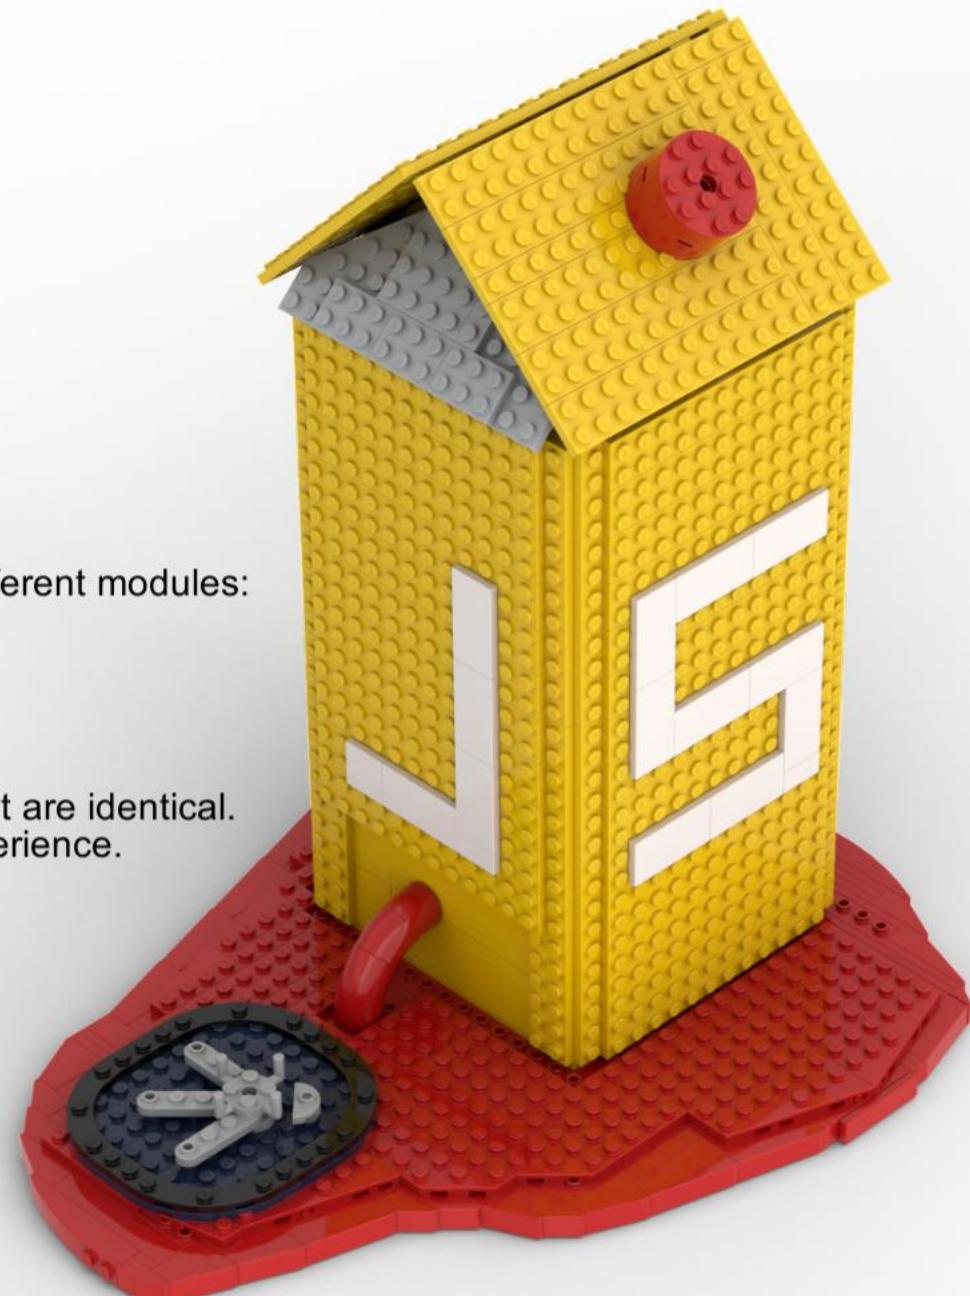

Notes:

The tower of the server-case is modular in design. It consists of 3 different modules:

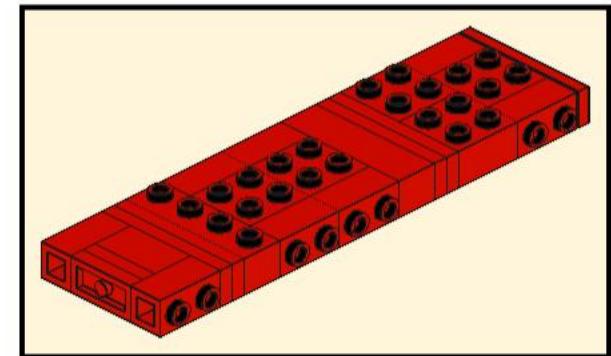

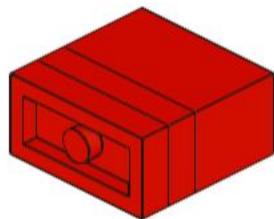

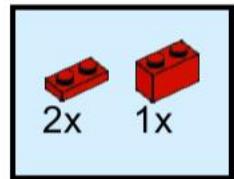

- * A: Pi module on left (2x)
- * B: Pi module on right (2x)
- * C: Airflow extension module (4x)

These modules are stacked in A-C-B-C-A-C-B order.

The instructions for each additional module (per type) beyond the first are identical.
Each module-type can be built simultaneously for an easier build-experience.
